

CURRICULUM VITAE

Yathish Rao M R

Address : Davangere, Karnataka, India

Email: yathishraomr@gmail.com

Phone No: +91-7204495912

CAREER OBJECTIVE

To secure a challenging position where I can effectively contribute my skills as a motivated software professional, with strong interest in Java Full Stack and Backend development.

EDUCATIONAL QUALIFICATIONS

Degree / Certificate	Institution/ Board	Year	CGPA / Percentage
M.Tech in CSE	Lovely Professional University , Phagwara	Pursing	7.2 – II Sem
BE in CSE	GM Institute of Technology , Davanagere	2021-2025	7.8 CGPA
HSC	Smt Pushpa Shamanur Mahalingappa PU College, Davanagere	2021	76%
SSC	Anmol Public School, Davanagere	2029	62%

TECHNICAL SKILLS

Software : SQL Server , Apache(Maven) , Spring frameworks

Languages : Java, HTML, CSS, JavaScript

Frameworks : Spring Boot , React.js , Node.js

DBMS : MySQL , PostgreSQL , MongoDB

Tools: Postman, VS Code, IntelliJ IDEA , Eclipse, Spring Tool Suite, Git & GitHub

INTERNSHIP

Organisation : Sirintel Technology Pvt. Ltd., Davangere

Description: Worked on the *Tree Cutting Alarm System* using IoT. We used the ESP8266 module with sensors, LEDs, and a buzzer to detect tree-cutting activity and give real-time alerts. This helped me learn IoT basics, sensor handling, and simple hardware–software integration.

Organisation : Abeyaantrix Softlab (OPC) Pvt. Ltd., Davangere

Description: Worked on a Computer Class Registration System using Java and Spring Boot. Gained experience in real-time software development, backend logic, REST API creation, and database handling. Improved understanding of full-stack workflows and practical project implementation.

PROJECTS UNDERTAKEN

Project : Multi Plant Leaf Disease Detection Classification

Objective : To detect and classify Multiple leaf diseases using image inputs to help farmers identify issues early and avoid crop loss.

Description :

Developed a App-based system that allows users to upload Multi leaf images and get the predicted disease type. The system was built using Python, Django, Node.js, and React.js. A machine-learning model was trained on a large dataset of potato leaf images for accurate classification. The project includes a user-friendly interface, backend API handling, and integration of ML predictions with the frontend.

Project : Tree Cutting Alarm using IoT (ESP8266)

Objective : To detect illegal tree-cutting activities and instantly trigger alerts to ensure safety and prevent deforestation.

Description:

Designed an IoT-based monitoring system using the ESP8266 microcontroller. The setup included motion/vibration sensors to identify cutting activity, along with LEDs and a buzzer to provide real-time alerts. The system was programmed to continuously monitor the environment and respond immediately when unusual vibrations were detected. This project helped demonstrate smart environmental monitoring using IoT technology.

Project : Computer Class Registration System

Objective : To create an online platform where students can easily register for computer classes and manage their enrollment.

Description:

Developed a complete web-based registration system using Python Django. The project included front-end pages for user interaction, back-end logic for handling registrations, and middleware for secure data processing. Features included student signup/login, class selection, and database storage of user details. This project helped improve understanding of full-stack development and database-driven applications.

WORKSHOPS / CERTIFICATIONS/ SEMINARS

Participated in **Smart India Hackathon (SIH)** and selected for the finals.

Participated in **multiple hackathons** at college and external events.

Completed a Workshop on IoT (Internet of Things), gaining hands-on experience with sensors, ESP modules, and real-time systems.

Earned a certificate in Soft Computing, covering basic machine learning and optimization techniques.

Attended a seminar on Handwritten Text Recognition, learning how ML models identify handwritten characters

EXTRA CURRICULAR ACTIVITIES

Smart India Hackathon (Finalist)

AIU Hackathon

Multiple Coding Hackathons

Technical Fest Activities

AWARDS AND HONOURS

Finalist – Smart India Hackathon (SIH)

Recognized for participation in multiple hackathons and coding events

Appreciation for project presentations in college

Active contributor in technical workshops and tech activities

LANGUAGES KNOWN:

English, Hindi, Kannada

HOBBIES:

Reading Story and Funny Books, Playing cricket, Rubik's Cube , Watching tech videos / learning tutorials , Fitness and outdoor activities

PERSONAL DETAILS

Mother's Name : Mangala T K

Father's Name : Ramesh M R

DOB: 23-12-2003

Gender : Male

Nationality: Indian
